

PROACTEYE

# Doctor Functionalities

## Towards Long-term Growth

Proacteye empowers Physicians to record real-time patient medical vital signs, helping clinics build a repository of patients' medical history and enabling prompt care delivery. All information about patients' visits to the clinic, including vitals, prescriptions, and orders, is stored by patient ID, assisting Physicians in retrieving and reviewing history for a thorough diagnosis.

### Care Team Recommendations

Physicians can access patients' information anywhere, anytime, thus providing patients with uninterrupted care delivery

PROACTEYE

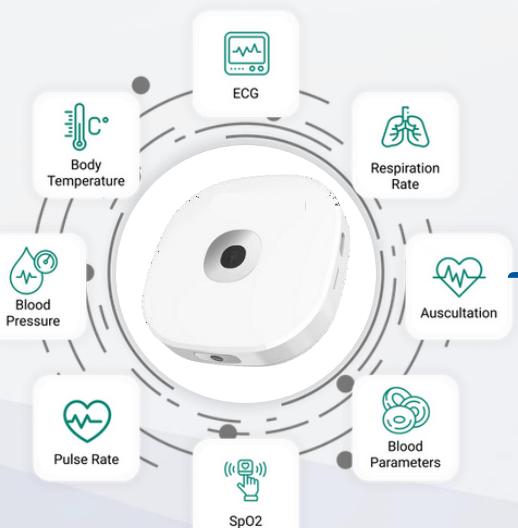

# Digitization Clinic

Proacteye transforms virtual consultations, providing physicians with real-time vital signs, historical data, and potential integration with diagnostic tools. This comprehensive information enables accurate remote diagnoses and personalized treatment plans.

# HOW PROACTEYE WORKS

Seamless Care Delivery Powered by Innovation

**All-in-one device**  
ECG, SpO<sub>2</sub>, digital stethoscope, blood pressure monitor, etc.

**Real-time Data + AI Analytics**  
Secure data transmission with AI-powered recommendations for timely intervention

**Integration**  
Proacteye easily integrates with your current workflow

**Physician Interface**  
Designed for clear visualization, alerts, and easy remote consultations.
